Our business operations are highly dependent on our customers, which we cater to and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations.

While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

2. *We generate our major portion of sales from our operations in certain geographical regions. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.*

We generate major sales from our customers situated at selected geographical regions. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. The table below sets forth a break-up of the revenue earned by our Company across various domestic states during the preceding three years and the half-year period ended September 30, 2024:

Existing and potential competitors to our businesses in these states may increase their focus on these states. The concentration of our operations heightens our exposure to adverse developments related to competition, as well as economic, political, demographic and other changes, which may adversely affect our business prospects, financial conditions and results of operations. While we strive to geographically diversify our product portfolio and reduce our concentration risk, we cannot assure you that adverse developments associated with the region will not impact on our business. If we are unable to mitigate the concentration risk, we may not be able to develop our business as planned and our business, financial condition and results of operation could be adversely affected.

This concentration of business subjects us to various risks, including but not limited to:

- (i) vulnerability to change in laws, policies and regulations of the political and economic environment;
- (ii) perception by our potential customers that we are a regional company which hampers us from competing for large and complex projects at the national level; and
- (iii) limitation on our ability to implement the strategy to cluster projects in the states where we intend to conduct business.

Further, any significant interruption to our operations directly or indirectly as a result of any severe weather or other natural disasters could materially and severely affect our business, financial condition and results of operations. Similar adverse consequences could follow if war, or war-like situation were to prevail or terrorist attacks, etc. In such instance, we may have to completely halt our operations which may severely impact our business operations. Any such disruption for any reason could result in significant increase of costs and delays in execution of orders.

Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside our present geographical regions may adversely affect our business prospects, financial conditions and results of operations. While our management believes that our Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance. While such instances have not materially occurred in the past, however future occurrence of any such instances could impact our earnings, financial condition and results of operation.

3. *We have a limited operating history in respect of our products, which may make it difficult for investors to*

evaluate our business and prospects.

In the year June, 2022, our Company commenced its business operations of manufacturing of rice bran oil from crude oil, for sale to oil manufacturers and packers. The table below sets forth a break-up of the product wise revenue earned by our Company during the preceding three years and period ended September 30, 2024 has been provided below:

We have a limited operating history. Due to our limited operating history, the investors may not be able to evaluate our business, future prospects and viability. Further, on account of our operating history, we may not have sufficient experience to address the risks relating to manufacturing our products and carrying out our business operations. Additionally, at an early stage, we may not be able identify risks involved in such operations and therefore could fail to achieve timely fulfillment of orders and the quality requirements of our products. While, we have sufficient orders for execution, we cannot assure you that we shall be able to execute the orders in a timely manner, without raising any product liability claims. Additionally, we may face challenges in planning and forecasting accurately as a result of our limited historical data and inexperience in implementing and evaluating our business strategies. Our inability to successfully address these risks, difficulties and challenges as a result of our inexperience and limited operating history may have a negative impact on our ability to implement our strategic initiatives, which may have an adverse effect on our business, prospects, financial condition and results of operations.

4. *Our business is dependent on the sale of our products to certain oil manufacturers with whom our Company has not entered into any long-term agreements purchasing our Rice Bran Oil. The loss of such customers, a significant reduction in purchases by such customers, or a lack of commercial success of their product of which we are a major supplier could materially adversely affect our business, results of operations and financial condition.*

We supply rice bran oil in bulk to certain oil manufacturers. We have historically derived, and may continue to derive, a significant portion of our income from sales to these customers. Any reduction in orders from our customers would adversely affect our income. The demand from our customers determines our revenue levels and results of operations, and our sales are directly affected by their production and inventory levels. Over the years, we have developed strong relationships with our customers through whom we have been able to increase the quality of our offerings. Our business depends on the continuity of business with these customers.

We have not entered into any long-term agreements with our customers and instead rely on purchase orders to govern the volume and other terms of our sales of products. Consequently, there is no commitment on the part of our customers to continue to place new purchase orders with us and as a result, our cash flow and consequent revenue may fluctuate significantly from time to time. Further, we may not find other customers for the surplus or excess capacity, in which case we may be forced to incur a loss due to lack of utilization of our production capacity. Our customers can terminate their relationships with us due to a change in preference or any other reasons, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability

because of fluctuations in demand for our products. Our Company's customers are under no obligation to place orders with us and may either cancel, reduce or delay orders. The orders placed by our institutional customers are dependent on factors such as customer satisfaction with the quality of our products, pricing of our products, customer's inventory management, amongst others.

Although, we have a strong emphasis on quality, pricing, timely delivery of our products and personal interaction by the senior management with our customers, any change in the buying pattern of our customers can adversely affect the business and the profitability of our Company.

5. We derive significant portion of our revenues from the sale of by-products derived during the processing of rice bran oil and any reduction in demand from its consumers could have an adverse effect on our business, results of operations and financial condition.

During manufacturing of rice bran oil, we generate various by-products such as fatty acid, wax gums and spent earth which are generally procured by industries such as Soap, Cosmetics, animal feeds and Batch type solvent plant. A break up of the revenue earned from sale of rice bran oil and its by-products during the preceding three years and the half-year period ended September 30, 2024 has been provided below:

Product	half-year period ended September 30, 2024		Fiscal					
			2024		2023		2022	
	Revenue earned in (₹ in lakhs)	% of total revenue	Revenue earned in (₹ in lakhs)	% of total revenue	Revenue earned in (₹ in lakhs)	% of total revenue	Revenue earned in (₹ in lakhs)	% of total revenue
Rice bran oil	7,875.80	89.20%	11,717.03	87.93%	7,490.15	74.98%	-	0.00%
By-products	402.77	4.56%	955.19	7.17%	656.03	6.57%	-	0.00%

Any reduction in demand from the consumers of our by-products could have an adverse effect on our business, results of operations and financial condition.

6. We highly depend on our key raw material and a few key suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of raw materials. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.

We are in the business of processing of rice bran oil from crude oil, for sale to oil manufacturers and packers. We are highly dependent on few raw materials which form primary component of our manufacturing process. We procure crude oil from domestic solvent plants and also purchase from local traders. The details of the raw materials procured by us are provided below:

Raw Material		Procured from
1	Crude Oil	Directly from solvent plant and traders from across India
2	Chemicals - Enzymes, Bleaching Earth, Citric Acid, Caustic Soda, Phosphoric Acid	Directly from the local manufacturers and traders across India

Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Further, we may not be able to replace our suppliers in a timely manner or arrange for suppliers who provide us the raw materials of the same quality as our previous suppliers.

We depend on a number of suppliers for procurement of raw materials required for manufacturing our products. Our Company maintains a list of registered and unregistered suppliers from whom we procure the materials on order basis as per our internal demand projections. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacture of our products, could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our

manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

Further, the amount of raw materials procured and the price, at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to rice bran oil industry in general. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers. Further, we also cannot assure you with a reasonable certainty that the raw materials that we would procure in the future will not be defective. In the absence of formal agreements, should we receive any defective raw materials, we may not be in a position to recover any advance payments made or claim compensation from our suppliers consequently increasing the manufacturing costs and/or reducing the realization of our finished products. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

7. *Our products are in the nature of commodities, and their prices are subject to fluctuations that may affect our profitability.*

Our earnings are to an extent dependent on the prices of the commodities that we sell mainly physically refined rice bran oil. These fluctuate due to factors beyond our control, including, amongst others, world supply and demand, supply of raw materials, weather, crop yields, trade disputes between governments of key producing and consuming countries and governmental regulation. Global demand for agricultural commodities may be adversely affected in periods of sustained economic downturn, while supply may increase due to weather patterns or long-term technological developments, all of which are factors beyond our control. High commodity prices have also led to an exponential rise in raw material prices, which could result in a decrease in our gross profit margin. Nonetheless, it is difficult to predict the specific price fluctuations that may occur and the exact impact which they may have on our earnings, and it is possible for such price fluctuations to adversely affect our business, results of operations and financial condition.

8. *All of our experience in respect of our business operations is limited to manufacturing of rice bran oil and therefore our Company has limited experience of packaging its products and selling them on a retail basis. Hence, we have limited exposure in operating a packaging line and marketing our products outside to retail customers, which may make it difficult to evaluate our past performance and prospects with respect to the same.*

We are in the business of processing of rice bran oil from crude oil and selling in bulk to oil manufacturers and packers. While, we leverage on our ongoing relationship with reputed brands and oil manufacturers, however we also intend to expand our customer base and product reach, by packaging our products in smaller quantities for sale to retailers and wholesalers. We also intend to create a brand presence of our products, which indirectly are already well placed in market, on account of being rebranded and sold by our customers. We intend to leverage the quality of our products for establishing a brand presence for our products in the domestic market. We intend to utilise an amount of ₹ 329.87 lakhs towards setting up of a packaging line at our existing manufacturing unit in Burdwan. We believe that our quality of products and efficient production process positions us well in the Indian market to capitalize on the demand for healthier cooking oils.

While, our Company has an experience of processing rice bran oil and marketing and selling the same in bulk to oil manufacturers and packers, however the experience that we have gained from our existing operations may not be fully relevant or applicable to our proposed expansion towards a retail customer base. We face additional risks if we undertake expansion and diversification of our customer base in which we do not possess the same level of experience.

Given our limited operating history in dealing with retail customers and understanding the demand and preference of retail customers, we may not succeed in addressing certain risks pertaining to such products in an early stage of growth, including our ability to acquire and retain customers or maintain adequate control of our

costs and expenses. Entering into new markets may pose challenges to our management, administrative, financial and operational resources. If we are unsuccessful in addressing business risks in time or at all, our business may be materially and adversely affected. Accordingly, investors should consider our business and prospects in light of the risks, losses and challenges that we face as an early-stage company. Further, our limited operating history may not provide a meaningful basis for evaluating our business, financial performance, prospects or results of operations, or to make a decision about an investment in our Equity Shares. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 78 of this Prospectus.

9. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

We have experienced negative cash flows in the past which have been set out below:

Particulars	(₹ in lakhs)			
	30th September, 2024	31st March, 2024	31st March, 2023	31st March, 2022
Net cash flow used in operating activities	43.80	36.08	(1,227.61)	5.11
Net cash flow used in investing activities	11.90	(5.51)	(140.08)	(1,089.96)
Net cash flow used in financing activities	(71.53)	(102.93)	1,473.09	1,089.92

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. Such negative cash flows lead to a net decrease in cash and cash equivalents. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares. For further details, please refer “*Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 167 and 204, respectively.

10. Our Group Company is engaged in a similar line of business as our Company and may compete with us.

Our Group Company, Birbhum Oils Industries Private Limited, are engaged in the same business as our Company, and may have common pursuits with our Company. We cannot assure you that there will be no conflict of interest in allocating business opportunities between us and our Group Company going forward. While, there is currently no active conflict between our Group Company and our Company, however we cannot assure you that there will not be any conflict of interest in allocating business opportunities between us and our Group Company going forward. We have not entered into any non-compete agreement with our Group Company, and there can be no assurance that our Group Company will not compete with our existing business or that we will be able to suitably resolve any such conflict without an adverse effect on our business and financial performance.

11. There can be no assurance that the objects of the Issue will be achieved within the time frame anticipated or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the plan for deployment of the Net Proceeds has not been appraised by any bank or financial institution.

Our Company intends to use the Net Proceeds towards the various heads as disclosed in the section titled “*Objects of the Issue*” on page 78. Further, the plans for deployment of the Net Proceeds are in accordance with our management’s estimates and have not been appraised by any bank, financial institution or any other external agency. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, and interest or exchange rate fluctuations and consequently its requirements may change.

In the event there is a shortfall in receipt of issue proceeds from this Issue, we may be unable to meet the equity requirement for the proposed manufacturing unit which may have a bearing on the commission of our manufacturing unit on time. In case of any shortfall of the proceeds raised from this Issue, there can be no assurance that we will be able to raise the funds through other sources to meet our obligations of meeting equity contribution for our proposed unit. In case of shortfall in the proceeds of this Issue which are to be utilized for meeting the objects of the Issue, the shortfall will be met by such means as are available to our Company at such future time and at the discretion of the management, including by way of cash available with us or by any other means permissible under law. We cannot assure that we will be able to arrange for adequate cash or will be able to procure further loans to meet the funding requirements. Any failure to meet the additional funding requirements will have a material adverse effect on the implementation of the proposed unit.

We may also be required to adhere to certain restrictive covenants as regards raising of finance for the unit from means other than those sanctioned under our present financing documents. Any failure or delay on our part to raise funds from the Issue or any shortfall in the Issue proceeds and subsequent inability of our Company to source alternate means of finance may delay the implementation of our project and could adversely affect our growth plans.

- 12. Our Company is yet to place orders for 100% of the plant and machinery. Any delay in placing orders or procurement of such plant and machinery or variation in foreign exchange rate, may further delay the schedule of implementation and increase the cost of commissioning the manufacturing unit.**

Our Company has received third party quotations for the plant and machinery required to be installed in the proposed packaging line, for details please refer to the chapter titled “Objects of the Issue” on page 78 of this Prospectus. Although, we have identified the type of plant and machinery to be purchased, we are yet to place order for 100% of the plant and machinery. Further, the cost of the machineries is based on the quotations received from suppliers and such quotations are subject to change due to various factors such as, change in supplier of equipment, change in the government regulation and policies, change in management’s view of desirability of the current plans, possible cost overruns, etc. Since, we have not yet placed orders for the said plant and machinery we cannot assure that we will be able to procure the same in a timely manner and at the same price at which the quotations have been received. Delay in procurement of the same or fluctuation in the foreign exchange rate can cause time and cost overrun in the implementation of our proposed project and can also compel us to buy such machineries at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

- 13. There have been instances of delays in payment of statutory dues, i.e. GST by the Company. - 18. There have been instances of delays in filings of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to ROC.**

In the past, there have been certain instances of delays in filing statutory forms which have been subsequently filed by payment of an additional fee as specified by ROC. The details of such forms have been provided below:

Form Type	Due Date of Filing	Actual Date of Filing	Reason for Delay
DPT-3 (2023-24)	30.06.2024	15.07.2024	Technical issues on MCA Portal

No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

- 19. The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, or any real or perceived contamination in our products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.**

All the products that we manufacture are for human consumption and are subject to risks such as contamination, adulteration, and product tampering during their manufacture, transport or storage. Our raw materials and our products are required to be stored, handled, and transported at specific temperatures and under certain food safety conditions. Any shortcoming in the production or storage of our products due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable regulatory standards. Any allegation that our products contain contaminants could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis.

The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, or any real or perceived contamination in our products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.

- 20. If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of**

operations and financial condition.

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. For instance, our Company has made applications for (i) Fire Safety Certificate before Government of West Bengal Office of the Divisional Fire Officer, East Bardhaman; (ii) renewal of license under the West Bengal Fire Services Act, 1950 before Collector, Fire License Section, Kolkata; and (iii) for obtaining a license to operate a factory under the West Bengal Right to Public Services Act, 2013, however, we cannot assure you that such licenses will be granted or renewed in time or at all. Additionally, we are yet to apply for licenses and approvals required for setting up of the packing line in our existing manufacturing unit. Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled "*Government and Other Approvals*" beginning on page 227 of this Prospectus.

21. Our continued operations are critical to our business and any shutdown of our manufacturing unit may adversely affect our business, results of operations and financial condition.

Our manufacturing unit is located in Purba Bardhaman, West Bengal. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our current manufacturing unit is subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our manufacturing unit for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiralling cost of living around our unit may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness.

In addition to the above if our manufacturing unit suffers losses as a result of any industrial accident, we may be forced to shut down our manufacturing unit which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing unit may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing unit, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

22. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have a quality control and assurance division ("**Quality Division**") in our manufacturing unit which carries out the required tests on the materials received including raw materials which are used in the manufacturing process and also on the final products. Our quality laboratory

carries out tests on the raw materials and finished products to ensure that our products are compliant with the specifications provided by our customers in case of sales and are compliant with specifications of FSSAI. Our Quality Division also carries out tests on all the stages of our manufacturing processes to ensure that the quality is built through the process. We have implemented quality control processes for our raw materials and finished goods, however, we cannot assure you that our quality control processes or our product will pass the quality tests and inspections conducted by various agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the regulatory quality standards set by regulatory agencies and our customers as deviation from the same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

23. *Unfavourable local weather patterns may have an adverse effect on our business, results of operations and financial condition.*

As an edible oil company, our business is sensitive to weather conditions, including extremes such as drought, floods and natural disasters. There is growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather patterns and the frequency and severity of extreme weather and natural disasters. The availability of raw materials for our operations, which includes, amongst others, crude oil which is derived from rice bran may be adversely affected by longer than usual periods of heavy rainfall in certain regions or a drought caused by weather patterns such as the El Nino. Such events may have an adverse impact on the availability and prices of raw materials mainly crude oil for our operations, which may increase the costs of our operations as well as negatively affect our business, results of operations and financial condition.

24. *Any failure of diversification into additional oils may adversely affect our business, results of operations and financial condition.*

As a part of our diversification plans, we intend to enter the manufacturing, distribution, marketing and selling of oils, such as, sunflower oil, mustard oil, soya oil and palm oil. We intend to diversify our product portfolio for both our institutional clients and our customers. We will leverage our existing relationship with our clients for obtaining supply contracts to achieve high volume of sales. In the event of any failure to successfully diversify into new products due to lack of demand from the public for our new products under our own brand or lack of demand from institutional customers for our products may adversely affect our business, results of operations and financial condition.

25. *Any delays and/or defaults in payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we majorly supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

26. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we majorly require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Further, one of the objects of this Issue include funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see "*Objects of the Issue*" on page 78. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if an intermediary defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

27. *We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.*

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or

security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

- 28. *We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.***

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing unit and transportation of our products from our unit to our customers, which may be subject to various uncertainties and risks. We are dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our customers in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long term agreements with our transporters for our manufacturing unit and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

- 29. *Our Company has availed certain unsecured loans which may be recalled at any time.***

As of September 30, 2024, our Company has availed certain unsecured loans from our Promoter, Chhajer Agro Products Private Limited and other unrelated parties. As of September 30, 2024, the total outstanding unsecured loans availed by our Company are ₹ 489.07 lakhs, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page 219 of this Prospectus.

- 30. *Failure to identify and effectively respond to changing consumer preferences and spending patterns in a timely manner, may adversely affect the demand for our products, causing our business, results of operations, financial condition and cash flows.***

The edible oil market is characterized by frequent changes, particularly in consumer preferences, new products and product variations. The popularity and demand of our rice bran oil may vary over time due to changing consumer preferences, including those relating to new edible oil products or shift to other edible oil products like sunflower oil, ground nut oil etc. Consumer preferences in the FMCG markets are difficult to predict and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage. Our continued success depends on our ability to anticipate, gauge and react in a timely and cost - effective manner to changes in consumer preferences for our products, as well as to where and how consumers shop for those products. We continually work to enhance the recognition of our brands and products and refine our approach as to how, when and where we can market and sell our products. While we aim to introduce new brands and products from time to time, we recognize that consumer preferences cannot be predicted with certainty and can change rapidly, and that there is no certainty that, these will be commercially viable or effective or accepted by our consumers. If we are unable to foresee or respond effectively to the changes in market conditions, new and changing trends or desired consumer preferences, accurately anticipate and forecast demand for products, then there may be a decline in the demand and sales for our products, thereby reducing our market share and preventing us from acquiring new customers and retaining existing customers, which could have an adverse effect on our business, results of operations, financial condition and cash flows.

31. *Our inability to manage inventory in an effective manner could affect our business.*

Our business model requires us to maintain a certain level of inventory to meet the present and future orders. Crude Oil is the key raw material used to manufacture all of our products which we procure from traders or solvent units. There can be no assurance that we will be able to procure all of our future raw material requirements at commercially viable prices. We may not be able to stock adequate quantity of raw materials required by our Company. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

32. *Our business may expose us to potential product liability claims and recalls, which could adversely affect our results of operation, goodwill and the marketability of our products.*

We may be exposed to potential product liability claims, and the severity and timing of such claims are unpredictable. We face the risk of loss resulting from, and the adverse publicity associated with, product liability lawsuits, whether or not such claims are valid. We may also be subject to claims resulting from manufacturing defects or negligence in storage or handling which may lead to the deterioration of our products. We do not maintain a product liability insurance, therefore we will not be able to insure or cover the risks arising out of any such claims. Any product liability claims would likely require us to incur substantial amounts on litigation and require our management's time and focus. Further, customers may cease purchasing products from us. Accordingly, such product liability claims, may adversely affect our results of operation, goodwill and the marketability of our products.

33. *We have significant power requirements for continuous running of our manufacturing unit. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

Our manufacturing operations require significant amount of electricity and any interruption in the supply of power may temporarily disrupt our operations. Since, our manufacturing process requires high power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled "Our Business" on page 113 of this Prospectus.

34. *We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The edible oil market in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the

prices and products offered by our competitors. We may have to compete with new players in India and abroad who enter the market and are able to offer competing products. Our competitors may have access to greater financial, manufacturing, research and development, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the products prices and payment terms offered by them. In addition, our customers may enter into contract manufacturing arrangements with third parties, for products that they are presently purchasing from us. Our failure to successfully face existing and future competitors may have an adverse impact on our business, growth and development.

Further, some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market. Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see “*Industry Overview*” on page 100 of this Prospectus.

35. *Our Promoter, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoter, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoter, Directors and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of Promoters*” in the chapter titled — “*Our Promoter and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 148, 142, 159 and 156, respectively of this Prospectus.

There can be no assurance that our Promoter, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoter and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

36. *Stringent food safety, consumer goods, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.*

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. We may also be subject to additional regulatory requirements due to changes in governmental policies. Further, we may also incur additional costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These laws and regulations are increasingly becoming stringent and may in the future create substantial compliance or remediation liabilities and costs. These laws may impose liability for non-compliance, regardless of fault. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we intend to comply with applicable regulatory requirements, it is possible that such

compliance may prove restrictive, costly and onerous and an inability to comply with such regulatory requirement may attract penalty. For details see, “Government and Other Approvals” beginning on page 227.

- 37. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.**

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 78 of this Prospectus.

- 38. Our success largely depends upon the knowledge and experience of our Promoter, Directors, and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.**

The growth and success of our Company’s future significantly depends upon the experience of our Promoter and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoter and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “Our Management” on page 142 of this Prospectus.

41. The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined through fixed price mechanism. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “*Capital Structure*” on page 66 of this Prospectus.

42. Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

43. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of September 30, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “*Restated Financial Information*” at page 167.

While we believe that all our related party transactions have been conducted on an arm’s length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

44. *Our Promoters have extended personal and corporate guarantees and collateral securities with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees or withdrawal of the collateral securities may adversely affect our business operations and financial condition.*

Our Promoters, Dilip Chhajer, Vandana Chhajer, Lakshay Jain and Shrey Jain have extended personal guarantees and Chhajer Agro Products Private Limited has extended corporate guarantees to secure the loans availed by our Company. Further, Chhajer Agro Products Private Limited has extended its own property as collateral security for securing the loans availed by our Company. In the event any of these guarantees are revoked or properties are withdrawn, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. If the guarantees is invoked, the ability of our Company to continue its business operations could be adversely affected. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled “*Financial Indebtedness*” on page 219 of this Prospectus.

45. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 219 of this Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

46. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

As on September 30, 2024 our Company's total borrowings are ₹ 2,360.06 lacs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — "*Financial Indebtedness*" on page 219 of this Prospectus.

47. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over our movable and immovable properties. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be subject to forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information, kindly refer the chapter titled "*Financial Indebtedness*" beginning on page 219 of this Prospectus.

48. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than ₹ 10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

49. *Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.*

Our Company intends to use the Net Proceeds towards various heads, as disclosed in the section titled "*Objects of the Issue*" on page 78. In case of any exigencies arising out of business conditions, economic conditions, competition or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure or fund which expenditure cannot be determined with certainty as on the date of this Prospectus. In terms of Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in the Prospectus, we cannot assure that we will be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we

cannot assure you that the Promoters of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

50. Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance, fire, riots, third party liability claims, etc. Details of the insurance policies availed by our Company have been provided below:

S. No.	Insurer	Description of Property Insured	Policy No.	Expiry date	Insured Amount (₹ in Lakhs)

2.	United India Insurance Company Limited	Machinery SI	0318014424P107075315	06/08/2025	144.25

5.	United India Insurance Company Limited	Contents and Building	0318011124P100160572	31/03/2025	3,000.00

There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

51. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled "Dividend Policy" on page 166 of this Prospectus.

52. We have not independently verified certain data in this Prospectus.

We have not independently verified data from the industry and related data contained in this Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere

and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

53. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

54. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

55. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

56. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

57. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

58. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.*

The Equity Shares will be listed on the SME Platform of BSE Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchange, trading in the Equity Shares is to commence within three (03) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI. We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

59. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

60. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;

- performance of our competitors and the perception in the market about investments in the industries in which we operate;
- adverse media reports about us or the industries in which we operate;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

61. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

62. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

63. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

64. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of

India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 (“**PDP Bill**”) was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India (“**MoEIT**”) has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

65. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our activities in India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India’s present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighboring countries; and
- prevailing national, regional or global economic conditions, including in India’s principal export markets.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the industries in which we operate.

66. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

67. *Any downgrading of India’s debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

68. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

69. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

70. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

71. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Given the dynamic nature of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions competitive environment and interest or exchange rate fluctuations, changes in design and configuration of the setting up of a packing line at our existing manufacturing unit, increase in input costs of construction materials and labour costs, logistics and transport costs incremental preoperative expenses, taxes and duties, interest rate and finance charges, engineering procurement and construction costs, working capital margin, regulatory costs, environmental factors and other external factors which may not be within the control of our management. Moreover, if the actual utilisation towards any of the Objects is lower than the proposed deployment such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the gross proceeds from the Issue in accordance with the SEBI ICDR Regulations. In case of a shortfall in raising requisite capital from the Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned objects, per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned Objects.

For further details see “*Risk Factor – Risk Factor 9 - There can be no assurance that the objects of the Issue will be achieved within the time frame anticipated or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the plan for deployment of the Net Proceeds has not been appraised by any bank or financial institution*” on page 28.

The fund requirements mentioned above for setting up of a packing line at our existing manufacturing unit are based on the internal management estimates of our Company and quotation received from third parties. The fund requirements mentioned above except for purchase of plant and equipment and civil works are based on the internal management estimates of our Company, and have not been verified by the Lead Manager or appraised by any bank or financial institution. The fund requirements are based on current circumstances of our business and our Company may have to revise its estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations. Consequently, the fund requirements of our Company are subject to revisions in the future at the discretion of the management. In the event of any shortfall of funds for the activities proposed to be financed out of the Net Proceeds as stated above, our Company may re-allocate the Net Proceeds to the activities where such shortfall has arisen, subject to compliance with applicable laws. Further, in case of a shortfall in the Net Proceeds or cost overruns, our management may explore a range of options including utilising our internal accruals or seeking debt financing. For further details see “*Risk Factors – Risk Factor 49 - Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval*” on page 41.

The fund requirements set out for the aforesaid objects of the Issue are proposed to be met entirely from the Net Proceeds. Key assumptions for working capital requirements

Our Company's estimated working capital requirements on a standalone basis are based on the following key assumptions:

S. No.	Particulars	Assumptions
Current Assets		
1	Trade Receivables	Our Company's general credit terms vary across type of business and customer. We had Debtors Holding days of 3 days, 2 days and 7 days in FY2023, FY2024 and half year ended September 30, 2024, respectively. We expect Debtors Holding days to be around 9 days for FY2025 and 10 days for FY 2026. As we are planning to inter into small packet segment with the setting up of our new packing unit, we may be required to offer higher credit period to the wholesalers and distributors. Thus, we expect our debtor holding period to increase from 7 days during stub period to 9 days in FY2025 and 10 days FY2026.
2	Inventories	Our Company's general inventory holding period of 54 days, 48 days and 42 days in FY2023, FY2024 and half year ended September 30, 2024, respectively. We expect Inventory Holding days to be around 38 days for FY2025 and 36 days for FY 2026. As we are planning to inter into small packet segment with the setting up of our new packing unit, we can have a lower inventory holding period. Thus, we expect our inventory holding period to further decrease to 38 days in FY2025 and 36 days FY2026.
Current Liabilities		
1	Trade Payables	We had creditors payment cycle of 8 days, 4 days and 17 days in FY2023, FY2024 and half year ended September 30, 2024. We expect our creditors payments days be around 10 days for FY2025 and 7 days in FY2026. The company is trying to lower creditors by paying earlier, leading to more discounts and hence better profitability.

Reason for substantial increase of working capital requirement are mentioned below:-

We are in the business of processing of rice bran oil from crude oil, for sale to oil manufacturers and packers. We manufacture various rice bran oil under various grades and colours, based on the requirement of our customers. We believe that rice bran oil is healthier than the other options available in the market, on account of it having an ideal balance of polyunsaturated fats and monounsaturated fats, in almost a 1:1 ratio. Since rice bran oil is made from bran, it is rich in Vitamin E, an antioxidant. We have crafted our business model in such a manner that we market and sell, our finished products, being rice bran oil, as well as the residue and waste material collected while processing our products. Therefore, we also market and sell, fatty acid, gums, spent earth and wax to other oil manufacturers or in the open market. We believe that setting up a packaging unit will provide us the ability of (i) building our own brand and (ii) scaling our operations by adding additional products as part of our product portfolio, thus contributing immensely towards our business operations and market position.

During the fiscal year 2024, the total working capital requirement was ₹ 1,792.04 Lakhs. However, this is estimated to be ₹ 1,695.46 Lakhs during FY2025 and ₹ 2,178.29 Lakhs during FY2026. The reasons for increase in future working capital requirements of our company are as under:

SECTION IV – ABOUT THE COMPANY

INDUSTRY OVERVIEW

SECTION V – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia’s war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events. Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of pre-pandemic (January 2020) projections, especially in emerging market and developing economies.

The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its pre-pandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below pre-pandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with pre-pandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below pre-pandemic projections. Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to pre-pandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes.

Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis. Divergences in labour market performance across regions broadly mirror those for output and consumption. Employment and labour participation rates are estimated to exceed prepandemic trends in advanced economies but to remain significantly below them in emerging market and developing economies, reflecting more severe output losses and much weaker social protection. Countries that had the most limited fiscal space are also those where employment shortfalls are the largest (ILO 2023). Among advanced economies, the euro area has seen larger employment gains than the United States. This may reflect more extensive use in the former of worker-retention programs modelled on the German Kurzarbeit short-time work scheme (IMF 2020), which protect workers’ income and allow businesses to retain firm-specific human capital, reducing the costly process of separation, rehiring, and training. In the euro area, these programs bolstered employment during the most challenging phases of the crisis and accelerated the recovery when economies reopened.

Investment, on the other hand, has uniformly fallen short of pre-pandemic trends across regions. Businesses have shown less enthusiasm for expansion and risk taking amid rising interest rates, withdrawal of fiscal support, dimmer prospects for product demand, stricter lending conditions, and growing uncertainties regarding geoeconomic fragmentation. Higher leverage has further dampened investment which remains 3 percent to 10 percent lower across

regions than had been projected before the pandemic. Moreover, the pandemic, war in Ukraine, and worsening climate shocks have contributed to a reversal in decades-long poverty reduction trends. According to World Bank staff estimates, 75 million to 95 million more people were living in extreme poverty in 2022 compared with pre-pandemic estimates. Spikes in food prices and related insecurities following Russia's invasion of Ukraine, as well as bouts of extreme weather, have accentuated these difficulties. The global average temperature in July 2023 was the highest on record for any month, amid reports of catastrophic flooding, heat waves, and wildfires in many regions. Overall, the global prevalence of undernourishment is significantly higher than before the pandemic.

OVERVIEW OF THE INDIAN ECONOMY

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at

US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Edible Oil Industry

Introduction

Edible oils and Fats are essential ingredients for a wholesome and balanced diet and they are vital items of mass consumption. The Department of Food and Public Distribution deals with issues related to the Vegetable Oil Processing Industries, Price Control, Inter State trade & commerce and also supply & distribution of vanaspati, oilseeds, vegetable oil, cakes and fats. The Directorate of Sugar and Vegetable oils is staffed with qualified technical people who assist the Ministry in the coordinated management of Vegetable Oils Policy, particularly relating to production/availability and monitoring of prices.

Main types of Edible Oils

There are two sources of oils viz. primary source and secondary source. The primary sources of oil are nine principal oilseeds viz. groundnut, rapeseed/mustard, soyabean, sunflower, sesame, niger, safflower, castor and linseeds. Edible oils obtained through secondary sources include coconut, cottonseed, palm, rice bran and oilseed cakes. As per the 4th Advance Estimates of Ministry of Agriculture released on 17.08.2022 for 2021-22, estimated Oilseeds production is about 376.97 lakh mt and estimated production of oils from these oilseeds in 2021-22 comes to about 89.66 lakh MT. The total availability of edible oils from primary as well as secondary sources is estimated at 115.71 lakh MT. Figures pertaining to domestic production of edible oils during 2021-22 (November to October) is estimated as follows:

Domestic Production of Edible Oils (2021-22) November to October (in lakh MT)

Mustard	36.44	Linseed	0.34
Soyabean	20.82	Coconut	5.56
Groundnut	22.92	Cottonseed	10.81
Sunflower	0.84	Rice bran	10.90
Sesame	2.38	Solvent extracted oils	3.50
Niger Seed	0.10	Tree & forest origin	1.50
Castor	5.66	Palm Oil	3.58

Consumption pattern of Edible Oils in India

India is a vast country and inhabitants of several of its regions have developed specific preference for certain oils largely depending upon the oils available in the region. For example, people in the South and West prefer groundnut oil while those in the East and North use mustard/rapeseed oil. Likewise several pockets in the South have a preference for coconut and sesame oil. Inhabitants of northern plain are basically consumers of fats and therefore prefer Vanaspati, a term used to denote a partially hydrogenated edible oil mixture of oils like soyabean, sunflower, ricebran and cottonseed oils. Many new oils from oilseeds of tree and forest origin have found their way to the edible pool largely through vanaspati route. Of late, things have changed. Through modern technological means such as physical refining, bleaching and de-odorization, all oils have been rendered practically colorless, odorless and tasteless and therefore, have become easily interchangeable in the kitchen. Oils such as soyabean oil, cottonseed oil, sunflower oil, rice bran oil, palm oil and its liquid fraction- palmolein which were earlier not known have now entered the kitchen. The share of raw oil, refined oil and vanaspati in the total edible oil market is estimated roughly at 35%, 60% and 5% respectively. Per capita consumption of edible oils in the country as compared to world per capita consumption of edible oils since last five years has been as under:

	<i>(Kg per annum)</i>				
YEAR	2017-18	2018-19	2019-20	2020-21	2021-22
INDIA	19.5	21.6	19.8	19.7	21.0
WORLD	29.3	30.5	27.0	30	30

Demand and Supply of Edible Oils

The production of domestic oilseeds has been steady since 2010-11. As oilseeds are cultivated on marginal land and largely dependent on rainfall, their production has been stagnant for the last couple of years. Favorable climatic conditions all over the country during the past year have led to an increase in the production of oilseeds and thereby edible oils. However, domestic demand for edible oils has been increasing at a pace faster than that of production due to growth in population and improvement in the standards of living of people, hence domestic production is insufficient to meet the demand. The short fall which is around 55% is met through imports.

As per the 4th Advance Estimates released by the Department of Agriculture, Cooperation and Farmers Welfare the estimated production of oilseeds for 2021-22 is 376.97 LMT as against 359.45 LMT in 2020-21. The total availability of edible oils from all sources (primary and secondary) for 2021-22 is estimated at 115.71 LMT as against 111.51 lakh tons in 2020-21. The gap between demand and supply is about 55% and is met through imports. Out of the total quantity of oils imported, Palm oils (Crude + Refined) constitute around 57% and are imported mainly from Indonesia and Malaysia, while Soyabean oil constitutes around 29% and is imported from Argentina and Brazil. Sunflower oil constitutes around 14% and is imported mainly from Ukraine. The domestic production and import of edible oils during the last five years is as follows:

Price Trend

Price pressures in oils and fats (weight of 7.8 per cent in CPI-Food and beverages) eased gradually since June 2022 as global prices of edible oils, particularly palm oil, declined sharply (Refer below the chart on the left). Edible oil prices increased sharply during March-May 2022 on account of a rise in global prices as the Ukraine conflict and imposition of export ban on crude palm oil by Indonesia in April 2022 severely impacted the supply of edible oils in the global market. Moreover, depreciation of the Indian Rupee on the back of high dependence on imports of edible oils also added to the rising domestic prices. The price momentum eased gradually with the softening of global prices, lifting of export ban and removal of export levy till October 31, 2022 by Indonesia. The government also undertook several supply-side measures which included extending zero per cent basic customs duty (BCD) on crude palm oil, sunflower and soybean oil till March 2024, reduction in BCD on refined soybean, and sunflower and palm oil to 17.5 per cent and 12.5 per cent (from 32.5 per cent and 17.5 per cent), respectively, and reduction of import duty on refined palm oil to zero till March 2024. In addition to these, the government also imposed stock limits on edible oils and oilseeds till December 31, 2022 and exempted BCD and agricultural infrastructural development cess (AIDC) on allocated Tariff Rate Quota (TRQ) for import of 20 lakh metric tonne of crude soybean oil and sunflower oil for 2022- 23. These measures together led to a steady decline in the prices of edible oils.

Import and Export Policy of Edible Oils in India

The country has to rely on imports to meet the gap between demand and supply. Import of edible oil is under Open General License. In order to harmonize the interests of farmers, processors and consumers and at the same time, regulate large import of edible oils to the extent possible, import duty structure on edible oils is reviewed from time to time. W.E. F. 14.06.2018, the import duty on all crude and refined edible oils was raised to 35% and 45% respectively while the import duty on Olive oil was increased to 40%. With effect from 01.01.2020, the import duty on Crude and Refined Palm Oil was revised to 37.5% and 45% respectively. With effect from 08.01.2020, import policy of Refined Palm Oil is amended from 'free' to 'Restricted' category. With effect from 27.11.2020, the import duty on crude palm oil has been revised from 37.5% to 27.5%. With effect from 14.10.2021, basic duty on Crude Palm Oil, Crude Soyabean Oil and Crude Sunflower Oil is Nil. The Agri-cess on these Oils has been brought down 5% for Crude Palm Oil, Crude Soyabean Oil and Crude Sunflower Oil. The basic duty on Refined Soyabean and Refined Sunflower Oil has been slashed to 17.5% and for RBD Palmolein Oil basic duty has been reduced to 12.5%. The present import duty structure has been extended till 31st March, 2024. In order to ensure availability of edible oil in the country, export of edible oil has been banned w.e.f. 17.03.2008, which was extended from time to time. With effect from 06.02.2015, export of rice bran oil in bulk has been permitted. With effect from 27.03.2017, export of groundnut oil, sesame oil, soyabean oil and maize (corn) oil has been permitted.

With effect from 06.04.2018, export of all edible oils except mustard oil was made free without quantitative ceiling; pack size etc, till further orders. Export of mustard oil is permitted in packs of up to 5 Kg with a Minimum Export Price (MEP) of USD 900 per MT.

Raw Materials

Rice Bran: Rice bran is the principal raw material used for the production of rice bran oil. Rice bran is a byproduct of the rice-milling process and is found in abundance in rice producing areas. As per Final Estimates for 2022-23 released on October 18, 2023, total production of rice during 2022-23 is estimated at record 1,357.55 Lakh tonnes. It is higher by 62.84 Lakh tonnes than previous year's Rice production of 1294.71 Lakh tonnes and by 153.65 Lakh tonnes than the last five years' average production of 1,203.90 Lakh tonnes. As per the Final Advance Estimates of Area, Production and Productivity of Principal Crops during 2022-23 as per Department of Agriculture, Government of Maharashtra, Chandrapur district is one of the largest rice producing areas in Vidharba Region of Maharashtra with a production of 2,707.70 '00tonnes and therefore rice bran is easily available at competitive prices in this region.

Corn/Maize: Maize is the third most important cereal crop in India after rice and wheat. It accounts for around 10 percent of total food grain production in the country. India is also the fifth largest producer of Maize in 2020 as per FAO data and India's share in world production accounted to be 2.59 per cent in the same year. As per Final Estimates for 2022-23 released on October 18, 2023, the estimated production of maize during 2022-23 is 380.85 Lakh tonnes. As per the Final Advance Estimates of Area, Production and Productivity of Principal Crops during 2022-23 as per Department of Agriculture, Government of Maharashtra, the maize production in the State of Maharashtra was 38,881.60 '00 tonnes.

Rice Bran Oil

Rice bran oil is extracted from the hard outer brown layer of rice after chaff or rice husk. It is well known for its high smoke point of 232 °C i.e. 450 °F and mild flavour, making it fit for high-temperature cooking methods such as stirfrying and deep-frying. It has an ideal balance of Polyunsaturated Fats (PUFA) and Monounsaturated Fats (MUFA), in almost a 1:1 ratio. Since rice bran oil is made from bran it is rich in Vitamin E, an antioxidant. Processing and Production of Solvent Extracted Oils Capacity Utilisation in OY 2022-23 increased during the year. Solvent extraction processing of oilseeds including soyabean, oilcakes and rice bran during OY 2022-23 is provisionally reported at 265 lakh tonnes compared to 250 lakh tonnes during the previous year. The overall production of solvent extracted oils during OY 2022-23 from rice bran, oil cakes, minor oilseeds and soybean is reported at 40.8 lakh tonnes as against 38.5 lakh tonnes during 2021- 22.

As India the world's largest importer of vegetable oil tries to meet edible oil shortage caused by global supply constraints, rice bran has become a sought-after commodity. Rice bran is traditionally used for cattle and poultry feed as it is a by-product in rice milling. Rice bran is popular among health-conscious consumers but has historically been more expensive than rival oils while in recent years oil mills have begun to extract rice oil.

As it is one of the fastest growing edible oils, it forms a small part of the total consumption of vegoil in India. Production and imports are set to increase to meet the demand. Indonesia's ban on palm oil exports and disruptions to sunflower oil shipments from Ukraine have eroded rice bran oil's traditional premium over rival oils recently. Since it has flavor properties similar to sunflower oil, this has increased the demand for bran oil.

Secrete: General of International Association of Rice . Mehta said, "As the import of sunflower oil sine decreased, consumers began to replace it cran oll. india usually meets more than two-thirds sufiower oil requirements through imports from pizzing" As per the data compiled by Solvent Extractors Asseociation of india (SEA), "Rice bran oil typically commands a premium of about 25 percent over other oils, but in recent months it has become cheaper than imported vegetable olls, making it more affordable to the public. Competitive prices have boosted consumption of rice bran oil since March and encouraged companies to extract more oil."

One of the consumer said, "Due to COVID-19, everyone was looking for healthy food options and Rice Bran Oil is that. Many consumers of sunflower oll have turned to rice bran oll because it tastes great in addition to being a healthy product. Even if the premium comes back, he will buy Rice Bran Oil for his family of four." According to Punit Goya, CEO of Raisela Group, the country's largest rice bran oil producer, "Rice bran oil has changed the economy for rice millers, who are now prioritizing bran oil production and ewes, while the demand for rice bran oil has become so strong. Instead of a by-product for rice mills, rice oran nas now become a main product. There are plans to increase the refinery capacity to meet the growing demand from 600 tonnes to 750 tonnes per day in the next two months." All India Rice Exporters Association President B.V. Krishna Rao said, "Due to shortage of vegetable oil, oil mills are ready to pay record high price for bran. The cost of milling paddy to extract rice is around Rs 19,000 per tonne while the cost of rice bran has increased from Rs 30,000 to Rs 36,000 per tonne. Since rice bran must be processed into oil within 48 hours of separation from the husk to be suitable for human consumption, the lack of oil processors in all rice milling areas remains a major limiting factor on the supply of bran oil. Currently only 55 percent of the bran is processed, with the remainder going to the low-cost feed market. Still, many oil production, with the country set for a record bran oil output of 1.05 million tonnes this year, up from about 950,000 tonnes in 2021, helping india reduce imports of rival oils." On of the exporters said, "As the population grew, incomes increased and people started eating out and edible oil consumption in India has tripled in the last two decades. The country consumes about 23 million tonnes of vegetable oil per year, of which about 13 million tonnes comes from imports. The Indian arms of Adani

Wilmar, Emami and Cargill have launched their Rice Bran Oil brands to meet the growing urban demand Rice bran oil brands have become popular and consumer acceptance is increasing.”

After removing the husk (chaff) which is the outer layer of the rice grain, unsaturated fatty acids in the right proportion, rice bran oil is one of the healthiest oils. For high temperature cooking like stir fry and deep fry, it comes with low viscosity and high smoke point which makes it perfect. When the oil is heated, its oil color is darker than other vegetable oils, which turn black. In South and East Asian countries, it is often used in various cuisines. In India, Nepal, Bangladesh, Indonesia, Japan and Malaysia are some of the countries in which this oil is popular. A lot of vitamins, antioxidants and nutrients are found in this oil while it is fat free. Rice bran oil helps fight blood diseases. Even improves the immune system and is reported to have myriad beneficial effects on cholesterol, high blood pressure, insomnia, and hyperglycemia. Oil added to food can enhance oxidative stability while also upgrading nutritional value. It has excellent storage stability and comes with a subtle and nutty flavour. This nutritious oil can also become the basis for cooking food as well as making vanaspati ghee. This oil helps in obtaining rice bran wax which is used in cosmetics, confectionery and shoe creams. Also it is recommended by World Health Organisation (WHO) because of its right balance of saturated, monounsaturated and polyunsaturated fats. Several nutrients in the oil such as γ -oryzanol, phytosterols, tocopherols, and tocotrienols provide numerous health benefits. The composition of crude rice bran oil includes around 81.3 -84.3 percent of Triglycerides, Diglycerides: 2- 3 percent Diglycerides, 5-6 percent Monoglycerides, 2-3 percent Free fatty acids, 0.3 percent Waxes, 0.8 percent Glycolipids, 1.6 percent Phospholipids and 4 percent Unsaponifiables. With a maximum free fatty acid level of 0.1 percent, a maximum peroxide value of 1.0 meq per kg, 0.05 percent moisture, an iodine value of 99 to 108, saponification value of 180 to 195, and a Lovibond color value of 3.5R, the rice bran oil comes, Lots of vitamin K and vitamin E is available in Rice bran oil.

Consuming poly and mono-unsaturated fats has been shown to like Bran Oil improve blood cholesterol levels and reduce the risk of heart attack and type-2 diabetes, also available in good amounts. Around 120 Calories, 0 gms Protein, 14 gms Fat, 0 gms Carbohydrates, 0 gms Fiber, and 0 gms Sugar comes in one spoon of rice bran oil.

Brown rice or the outer layer of the bran is To extract the oil form of rice bran, the milling process activates an enzyme in the bran that quickly breaks down lipids and destroys valuable fats. Raw rice bran has a very short shelf life, plus it leaves a narrow window for processors to extract the oil before it goes rancid. The physical size and structure of rice bran particles present additional challenges that make processing difficult, especially when racing against the clock to overcome these tricky enzymes. Processors can buy some extra time and tap into the extra profit by stabilizing the bran before extraction to ensure high yield, good quality rice bran oil. Rice bran is very valuable as an oil source with a higher fat content than soybeans, between 20-25 percent of which once extracted from the kernel is discarded as waste. The grinding process separates the bran from the kernel, generating frictional heat, which activates the fast-acting lipase enzyme in the bran. As the bran is thawed, these enzymes rapidly break down the triglycerides in the fat, releasing free fatty acids that accelerate rancidity and spoilage. These enzymes can destroy up to 10 percent of the oil in rice bran within a few days. It may spoil up to 70 percent of oil, with no potential benefit if left untreated after three months. So oil mills must act faster than the enzyme can to quickly extract the oil from the bran or find a way to stop the reaction in its tracks. Rice bran oil processing has a fine powdery texture of the bran, which can cause problems during extraction. These small particles can cause contamination in the plant and make the resulting oil more challenging to clarify after extraction. For rice bran oil processors, unless they find more cost-effective solutions, these inherent challenges could severely limit processing capacity, yields and profits.

Andersen International has developed a patented process to stabilize rice bran with Solvex™ Extender to address these processing challenges and the high pressure, high temperature environment inside Solvex safely inactivates enzymes while also compacting finer particles for more efficient solvent extraction. Solvex works like a continuous pressure cooker by increasing the pressure and temperature of the rice bran while adding steam and water to increase the moisture level. It is important to reach a moisture level of 25 percent to completely inactivate the enzymes because high moisture facilitates an effective heat transfer to destroy the lipase enzyme without scorching the fat while moisture levels below 15 percent can temporarily slow down enzymatic activity without stopping it.

Ethanol Industry

Ethanol is one of the principal biofuels, which is naturally produced by the fermentation of sugars by yeasts or via petrochemical processes such as ethylene hydration. It has medical applications as an antiseptic and disinfectant. It is used as a chemical solvent and in the synthesis of organic compounds, apart from being an alternative fuel source. The National Policy on Biofuels – 2018, provides an indicative target of 20% ethanol blending under the Ethanol Blended Petrol (EBP) Programme by 2030. By 2025, at 20% blending level, ethanol demand will increase to 1016 crore litres. Therefore, the worth of the ethanol industry will jump by over 500% from around Rs. 9,000 crore to over Rs. 50,000 crore. With a view to achieve blending targets, Department of Food and Public Distribution (DFPD) is making concerted efforts to enhance the ethanol distillation capacity in the country. Department of Food and Public Distribution (DFPD) is the nodal department for promotion of fuel grade ethanol producing distilleries in the country. Government has allowed ethanol production/ procurement from sugarcane-based raw materials viz. C & B heavy molasses, sugarcane juice / sugar / sugar syrup, surplus rice with Food Corporation of India (FCI) and Maize. An in-house study was conducted to understand potential for ethanol production from the lens of water consumption. It concluded that sugar continues to be the most lucrative food crop for ethanol even though it has the highest water consumption per acre. Amongst grains, maize is the least water-intensive crop that can be used for ethanol production, although the rate of conversion to ethanol is lower than for rice and broken rice. It is expected that capacity of molasses-based distilleries would increase from current levels of 426 crore litres to 730 and 760 crore litres by 2024-25 and 2025-26 respectively. 75 crore litres capacity is being added by existing grainbased distilleries; further OMCs are planning to set up about 10-15 new grain-based distilleries thereby adding capacity by 100-150 crore litres. Hence, capacity of grain-based distilleries is expected to reach 350, 450, 700 and 740 crore litres during 2022-23, 2023-24, 2024-25 and 2025-26 respectively from current levels of 258 crore litres.

The sale of our products is majorly made to oil manufacturers, which makes our business model business to business (B2B), wherein our Company processes and/or supplies rice bran oil to reputed manufacturers and packers in tankers. We majorly sell our products in bulk form to players operating with their own brands and to those who sell edible oil in unbranded or loose form. We also sell our products to re-packers who ultimately sell the oil either in their own brands or further sell in bulk form. We believe our business model adds value to our business operations by ensuring higher capacity utilization and improving the overall production efficiency and costs.

Since incorporation, it has been our Company's vision and focus to process and supply superior quality products to our customers, which has enabled us to expand our business operations. In order to set up internal controls for processing our products, we have set up an in-house laboratory for testing our raw materials and finished products.

We have a quality control and assurance division (“**Quality Division**”) in our manufacturing unit which carries out the required tests on the materials received including raw materials which are used in the manufacturing process and also on the final products. Our laboratory carries out oil analysis tests on the raw materials and finished products to ensure that our products are compliant with the specifications provided by regulatory bodies such as, FSSAI. In addition to testing our key products, we also carry out an in-process testing, wherein we on a sample basis measure the physical parameters of the oil processed by us at each and every stage of the production process. Additionally, we also undertake quality testing of each of our by-products and residue to check the amount of oil soaked by such products and the requirement of reprocessing a particular process to reduce wastage or to achieve efficiency. To ensure our standard of products we also undertake quality tests from third party laboratories.

We believe we operate a zero waste unit, wherein all the residue or by-products manufactured during the production process are either re-used in the production process or are sold to third parties or in the open market. The crude rice bran oil procured from our suppliers when processed generates by-products such as gums, wax, fatty acids, and residual spent earth in addition to refined oil. Our manufacturing unit is fully automated, made with high grade Stainless Steel 304, equipped with state of the art equipments and machinery for refining of crude oil and extracting by-products in an efficient manner, without any physical intervention of workforce. During the processing of crude rice bran oil, we sometimes use processed oil to avoid wastage and to ensure effective utilisation of our raw materials. We, therefore operate a zero wastage unit which increases our productivity and cost effectiveness. The details of the parties to whom we sell our by-products have been provided below:

S. No.	Particulars of by-products	Industry/ customers served
1.	Fatty Acid	Soap
2.	Gums	Soap
3.	Spent Earth	Batch type solvent plant
4.	Wax	Cosmetics and animal feeds

DESCRIPTION OF OUR PRODUCTS

We manufacture rice bran oil and its other by-products, details of which have been provided below:

Rice Bran Oil

Rice Bran Oil is one of the healthiest choices available in cooking oils. It has an ideal balance of polyunsaturated and monounsaturated fats making it ideal for a healthy heart. Rice bran oil offers numerous health benefits. The Vitamin E present in rice bran oil helps keep skin soft, supple, and wrinkle-free and also boosts immunity and help the body fight against infection and other common diseases.

We procure crude oil from domestic solvent plants and also purchase from local traders. We process domestically procured crude oil and extract certain by-products, including but not limited to fatty acid, gums and wax, to form finished rice bran oil.

We market and sell rice bran oil in bulk and lose form to oil manufacturers, refiners, re-packers and wholesalers.

By-Products

By-products derived during process of refining of oil includes fatty acid, wax gums and spent earth which are generally procured by industries such as Soap, Cosmetics, animal feeds and Batch type solvent plant..

OUR COMPETITIVE STRENGTHS

Modern and strategically located manufacturing facilities.

Our processing facility is strategically located near the ports of West Bengal. Our manufacturing unit is fully automated, made with high grade Stainless Steel 304, equipped with state of the art equipments and machinery for refining of crude oil and extracting by-products in an efficient manner, without any physical intervention of workforce. Our total refining capacity as at September 30, 2024 was 125 MT per day. Our processing unit has advanced equipment and technology supplied by Technior India Engineering. Technological developments are key in maintaining process efficiencies in refining and we have consistently invested in enhancing our refining infrastructure. We have invested in a high level automation at our facilities, which gives us an edge in production efficiencies, as well as ensuring consistent quality. Location and access to ports (land as well as sea) enable us to procure our raw materials at cost competitive prices, by reducing the expenses incurred towards logistics, especially given the high volumes that we procure from traders who import.

We adopt stringent quality control measures for our products. Given the high level of automation at our plant, we can produce the desired quality consistently. The oil is tested at various stages from the crude to intermediate to refined form. Only if the refined oil passes the stringent quality parameters, it is dispatched. Our laboratory at our refinery run round-the-clock to perform the tests to ensure high quality outputs. Our industrial customers themselves have stringent quality control requirements and perform regular audits of our facilities. We have a strong focus on innovation in processes to improve yields and reduce costs. These innovations have been possible due to the collective knowledge of many years of our senior production team in edible oils and fats technology.

Easy availability of crude oil around our manufacturing facility.

Crude oil is procured from local solvent units in West Bengal and other parts of the country and local traders. Our raw materials are therefore easily available for our manufacturing unit. Further, owing to the close proximity of ports and easy access of roads, we are able to easily procure our raw materials at low prices from our local traders and importers at low prices. The ease of availability of crude oil in abundance, which is our main raw material, ensures the smooth operations of our manufacturing facility, and production and sale of our finished products. In addition to the ease in availability, crude oil is also available to us at a competitive price which in turn enhances our ability to compete aggressively in pricing of our finished product as compared to our competitors.

Arrangements with institutional oil manufacturers for supply of rice bran oil

We market and sell rice bran oil in bulk and loose form to oil manufacturers, refiners, re-packers and wholesalers. We have entered into informal arrangements with institutional manufacturers and reputed brands for supplying our products in bulk.

As a part of our arrangement with these institutional manufacturers, we process the rice bran oil as per their quality requirements. Our existing relationships with such manufacturers helps us to get repeat business from them. This has helped us to maintain a long term working relationship with our customers and improve our customer retention strategy. We have strong existing client relationships which generates multiple repeat orders. We believe that our existing relationship with our clients represents a competitive advantage in gaining new clients and increasing our business. Further being a small and medium size organisation we rely on personal relationships with our customers. We believe that existing relationships will help as a core competitive strength for us.

Quality Assurance and Quality Control of our products.

We are committed towards quality of our products. OUR BUSINESS STRATEGIES

Setting up of a packing line at our existing manufacturing unit to focus on packing and selling our products in our own brand in small quantities

We are in the business of processing of rice bran oil from crude oil and selling in bulk to oil manufacturers and packers. While, we leverage on our ongoing relationship with reputed brands and institutional oil manufacturers, however we also intend to expand our customer base and product reach, by packaging products on our own brands in smaller quantities for sale to retailers and wholesalers etc. We also intend to utilise the packaging unit for third parties. Thus, we intend to create a brand presence of our products, which indirectly are already well placed in market, on account of being rebranded and sold by our institutional customers. We intend to utilise an amount of ₹ 329.87 lakhs towards setting up of a packaging line at our existing manufacturing unit in the district of Purba Burdwan. We believe that our quality of products and efficient production process positions us well in the Indian market to capitalize on the demand for healthier cooking oils.

Addition of ‘sunflower oil, mustard oil, soya oil and palm oil’ as an additional products

We intend to enter new product categories viz. sunflower oil, mustard oil, soya oil and palm oil for both our institutional customers and prospective end use customers. In accordance with this, while we seek to continue to

strengthen our existing product portfolio, we intend to further diversify into products with prospects for increased growth and profitability. We plan to continue to increase offerings in our current business segments as well as diversify into new products by tapping into segments which in the view of our management have attractive growth prospects. Further, we believe that with the strategic initiative of setting up a packaging line in our existing manufacturing unit, our customer base would be diversified, as a consequence of the same, there will be a continuous demand to evolve our existing products and expand our product portfolio to meet these requirements. We believe that our emphasis on quality of manufacture and timely delivery of our offerings have been a key factor in our ability to attract new customers and to retain our existing customers. We intend to draw on our experience, market position and ability to timely deliver quality products to successfully foray into other sectors as well as to other geographies.

Diversifying and increasing penetration in markets

Our Company is proposing to expand its business operations globally by exporting our products/by-products to countries/continents such as Japan, Europe and America. Our by-products find various applications in manufacture of medicinal products and laminated bags. Our Company believes that the global markets offer various opportunities in term of sub-geographic penetration and product/ market diversification which we intend to seize and increase our market share by exploring untapped markets and segments to enhance our geographical reach.

Strengthen our marketing network

We intend to increase our distribution network by branding our products and selling the same to retailers and wholesalers, which would require a widespread sales and marketing network. - enhance our depth of experience, knowledge-base and know-how; and
- increase our network of distributors, customers and geographical reach.

DETAILS OF OUR BUSINESS

RAW MATERIAL PROCUREMENT

We procure crude oil from domestic solvent plants and also purchase from local traders, who in turn import it from Bangladesh. The details of the raw materials procured by us are provided below:

Raw Material		Procured from
1	Crude Oil	Directly from solvent plant and traders from across India
2	Chemicals - Enzymes, Bleaching Earth, Cytric Acid, Caustic Soda, Phosphoric Acid	Directly from the local manufacturers and traders across India

MANUFACTURING PROCESS

The crude rice bran oil procured from our suppliers undergoes processing and refinement to eliminate gums, wax, fatty acids, and residual odours. This is accomplished through a meticulous refining process. The result is a superior grade of edible oil, with Oryzanol as the major micro-nutrient. The refined rice bran oil is then packed in bulk in tankers and sold to our customers.

The rice bran oil refining process involves the following process:

Raw material testing: Upon receipt of the raw materials, our Quality Division tests the crude oil to assess its physical composition as per the parameters defined.. The quality of the oil is also checked to ensure that our final products meet with the quality requirements of our customers and regulatory agencies.

Standardisation of crude oil: We receive crude oil in several tanks depending on the orders placed by us. In order to ensure that the batch of the oil processed by us does not differ in physical composition, colour and taste, we mix different batches of crude oil to ensure homogeneity and standardisation of refine oil. Once the oil is mixed, the crude oil is then further transferred to the refinery segment of the facility for processing.

Enzymatic Degumming: Crude oil is pumped continuously in the retention tanks and constantly heated through heat exchanger at the required temperature , thereafter enzymatic solution (prepared by mixing different chemicals) is processed in hike mixer is mixed with crude oil and fed to the hydration tank and the oil is passed through sort mix separators to remove hydrated gums by mixing water... Gums free oil is then transferred to bleaching section.

Lab testing of gums: In order to ensure that the gums do not soak additional oil during the extraction process, our Quality Division tests the gums post the extraction process. If during the tests it is ascertained that the gums have soaked additional oil, the Enzymatic Degumming is again undertaken to reduce wastage and to ensure that the gums carry oil as per the approved levels.

Pre-Bleaching: Bleaching is a process of selective removal of pigments and impurities by the physical interaction of food grades- bleaching earth and carbon with degummed oil to improve its colour. This process is the art of removing colour pigments, dirt, removal of polycyclic aromatic compounds and moisture. The bleaching process is done with the help of bleachers to improve colour of oil and pressure leaf filters are used to remove bleaching earth and carbon from the oil. The bleached oil is then transferred to dewaxing section and spent earth is sold in the open market.

Dewaxing: The pre-bleached oil is transferred to dewaxing section where the higher melting point constituents like waxes or triglycerides from oil are eliminated by gradually cooling pre-bleached oil at 15-16°C. This process helps in crystallization and amalgamation of wax and saturated triglycerides. The crystallized wax and saturated triglycerides are removed with the help of leaf and plate filter and automatic filters and the dewaxed oil is transferred to post-bleaching section. The wax generated during the process is made available for sale to other industries. The dewaxing

process in refinery is a cost-effective way to increase profitability since it marks an essential step in the production of high-quality rice bran oil.

Post-Bleaching: The dewaxed oil undergoes the same bleaching treatment as referred in the pre-bleaching section to further remove the impurities from the dewaxed oil. Additionally, this process results in better colour, taste, and odour of the rice bran oil, leading to a superior end product that meets the quality standards of the market.

De-odorisation: The post-bleached oil is transferred to deodoriser. Deodoriser is a high vacuum vessel where oil is heated at temperature between 270-290 degrees through thermic fluid under vacuum to remove various volatile components such as fatty acid and bad odour. The final refined rice bran oil is passed through micro filters to remove any foreign particles and then transferred to refined oil tanks. Fatty acids are transferred to storage tanks.

Final testing: Prior to sale of rice bran oil, our Quality Division on a sample basis tests the final batch of the oil in our in-house laboratory to ensure that the oil is compliant with the quality standards of our customers and of the regulatory agencies. Final quality testing reports are kept for each batch for record purposes.

Testing and Quality Control

We have adopted a quality control system throughout the entire production process in our manufacturing facility. Our manufacturing facility has its own quality control and quality assurance team comprising of two personnel and has implemented quality control procedures. We also have an in-house QC laboratory to conduct tests on raw materials and refined rice bran oil. We undertake tests on raw materials such as crude oils procured by us on sample basis in terms of various parameters including oil content, moisture, fatty acids, odour, nutrients etc to comply with quality parameters. We also undertake tests on our refined rice bran oil for colour, stability, free fatty acid content and all statutory testing compliances as per FSSAI standards. The tests on refined rice bran oil are conducted on each batch manufactured during the refining process.

D. INTELLECTUAL PROPERTY LAWS

Trade Marks Act, 1999

Indian trademark law permits the registration of trademarks for goods and services. The Trade Marks Act, 1999 (“**Trade Mark Act**”) governs the statutory protection of trademarks and for the prevention of the use of fraudulent marks in India. An application for trademark registration may be made by individual or joint applicants and can be made on the basis of either use or intention to use a trademark in the future. Once granted, trademark registration is valid for ten years, unless cancelled, and may be renewed indefinitely upon payment of renewal fees every ten years. If not renewed after ten years, the mark lapses and the registration has to be restored. The Trade Mark (Amendment) Act, 2010 has been enacted by the Government to amend the Trade Mark Act to enable Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other countries. It also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to align the law with international practice.

In March 2017, the Trade Marks Rules, 2017 (“**Trade Mark Rules**”) were notified, in supersession of the Trade Marks Rules, 2002. The Trade Marks Rules brought with them some changes in the application process, in terms of an increase in application fees and common formats for multiple kinds of applications. However, the e-filing process has been incentivized by providing lower application fees.

E. FOREIGN TRADE RELATED LAWS

Foreign Trade (Development and Regulation) Act, 1992, as amended (“Foreign Trade Act”).

The Foreign Trade Act empowered the Central Government to make provisions for the development and regulation of foreign trade by way of facilitating imports into as well as augmenting exports from the country and in all other matters related to foreign trade. The government has also been given a wide power to prohibit, restrict and regulate the exports and imports in general as well as specified cases of foreign trade. It is authorised to periodically formulate the Indian Foreign Trade Policy, 2015-20 (“Foreign Trade Policy”) and amend it thereafter whenever it deems fit. All exports and imports are required to be in compliance with this policy. The Foreign Trade Policy provides for certain schemes for the promotion of export of finished goods and import of inputs. The Foreign Trade Act, read with the Foreign Trade Policy, also provides that no person or company can make exports or imports without having obtained an importer exporter code (IEC) number unless such person or company is specifically exempted. The IEC shall be valid until it is cancelled by the issuing authority.

SIGNIFICANT DEVELOPMENTS SUBSEQUENT TO THE LAST AUDITED FINANCIALS

After the date of last Audited Accounts i.e. for the period ended September 30, 2024, the Directors of our Company confirm that, there have not been any significant material developments.

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business is subjected to various risks and uncertainties, including those discussed in the section titled “*Risk Factor*” beginning on page 21 of this Prospectus. Our results of operations and financial conditions are affected by numerous factors including the following:

- We depend on a few customers for our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.
- We generate our major portion of sales from our operations in certain geographical regions. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.
- We have a limited operating history in respect of our products, which may make it difficult for investors to evaluate our business and prospects.
- Our business is dependent on the sale of our products to certain oil manufacturers with whom our Company has not entered into any long-term agreements purchasing our Rice Bran Oil. The loss of such customers, a significant reduction in purchases by such customers, or a lack of commercial success of their product of which we are a major supplier could materially adversely affect our business, results of operations and financial condition.
- We derive significant portion of our revenues from the sale of by-products derived during the processing of rice bran oil and any reduction in demand from its consumers could have an adverse effect on our business, results of operations and financial condition.
- We highly depend on our key raw material and a few key suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of raw materials. In the event we are unable to procure adequate amounts of raw materials, at competitive prices our business, results of operations and financial condition may be adversely affected.
- Our products are in the nature of commodities, and their prices are subject to fluctuations that may affect our profitability.
- All of our experience in respect of our business operations is limited to manufacturing of rice bran oil and therefore our Company has limited experience of packaging its products and selling them on a retail basis. Hence, we have limited exposure in operating a packaging line and marketing our products outside to retail customers, which may make it difficult to evaluate our past performance and prospects with respect to the same.
- There can be no assurance that the objects of the Issue will be achieved within the time frame anticipated or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the plan for deployment of the Net Proceeds has not been appraised by any bank or financial institution.
